

Thank you for hosting the Dallas Senior Interclub tournament

Please feel free to contact me, Dan Kirkwood at 214-995-6255 or dsi@dallasseniorinterclub.com, with any questions.

TIMES

- 8:30am - call to carts for announcements
 - Call to carts
 - announcements
- 8:45am - "head to tees"
- 9:00am - shotgun start
- Lunch as soon as play finishes

The following are the requirements for the event. Of great importance AND a source of discontent if not followed is the **"Course Setup Preparation"** below **limiting the overall length of the course to approximately 6,200 yards and the maximum length of any par-3's limited to 165 yards!**

• Food & Beverage

- We will need a small scoring table that can seat 2 people at the front near the "Scoring Sheets". This will be occupied by Dallas Senior Interclub staff for scoring.
- We will need 10 tables that seat 10 people each with "tents" containing the club-name on each table (there will be 100 people sitting even though not all will eat)
 - The names of the clubs:
 - Brookhaven
 - Canyon Creek
 - Eldorado
 - Hackberry Creek
 - Lantana
 - Oakmont
 - Prestonwood
 - Thorntree
 - Timarron
 - Trophy Club
- Please insure that there is a bar available to the players. At your preference it can be 'club-charge' only or include cash and/or credit cards payment.
- The Pro Shop will be provided a list of those electing to eat lunch. However, since this is not absolute, you should have someone taking names and club affiliations at the serving line.

• **Pro-Shop & DSI Captain**

○ **General**

- At 8:30 AM, announce that players should head to their carts, and be ready to proceed to their tees within 15 minutes.
- 8:30am – 8:45am is for announcements, local rules, rules of play, etc.
 - **Stableford Points**
 - **Double Eagle – 10 points**
 - **Eagle – 6 points**
 - **Birdie – 4 points**
 - **Par – 2 points**
 - **Bogey – 1 point**
 - **Double Bogey or higher – 0 points**
- Have your staff ready to lead the players to their respective tees promptly at 8:45 AM, with balls in the air no later than 9:00 AM.
- Our goal is to complete play no later than 2:00 PM (5 hrs).
- Please request that your management provide one or more drink carts during the tournament and have lunch ready as we finish.

○ **Course Setup preparation**

- It will be the responsibility of the host Captain/Co-Captain to coordinate with the pro and course superintendent to assure that the course will be appropriately set up
- **Courses on which the events are played will be set up to be approximately 6200-yards.**
- **No par-3 is greater than 165-yards.**

○ **Cart Rules (and modified Stableford points) – print and place on carts**

- <https://www.dallasseniorinterclub.com/wp-content/uploads/DSI-2019%20Cart%20Rules%20sheet.pdf>

○ **An excel spreadsheet will be sent from the DSI Commissioner (usually in the evening on the Friday before the event)**

- This will contain the teams from the clubs, pairings and who will be having lunch.
- Hopefully the columns are self-explanatory and all information is complete.
- It is sorted by “Clubname” + “Team Pairing” + “Last Name” which would be the normal way you would print the large blank scoring sheets that go on the wall.
- You should be able to import this file easily into Golf Genius or any other tournament pairing system you use.
 - The column “Pairing” is the correct order for foursomes for the cart cards with two in one cart from one club and two in one cart for another club. By convention we mix up which teams will ride with which teams on a pre-determined rotation schedule
 - The column “DSI Index” is a generated index adjusted to your slope and the DSI quota to use. If used as Index it SHOULD produce the correct quota
 - The column “CH” is the course handicap adjusted to your slope and the DSI quota to use
 - The column “Quota” is the quota for the players
 - The DSI keeps track of past play and adjusts Quota’s accordingly. The spreadsheet SHOULD import and using the DSI index supplied, create the correct QUOTA based on the slope (133 was used for your course). Please note that at the beginning of the year, all slopes were submitted and entered on the website.
- Each player has his GHIN and INDEX adjusted to your course slope to provide the expected DSI Stableford quota points required.
 - The DSI uses a stableford QUOTA where the QUOTA is based on previous play results.
 - The spreadsheet has the QUOTA expected
 - The spreadsheet also has an adjusted index that should result in the expected QUOTA based on your slope

- **When all is said and done, the main things are:**
 - Use the Quota's as specified in the spreadsheet
 - The cart pairings are as specified in the Pairing column
 - The scoring sheets are printed by club and it is helpful on the sheet if they are by "team pairing" (same as spreadsheet); **note: Team Pairing is not the same column as Pairing.**
- **A master PDF will be sent with excel spreadsheet (usually in the evening on the Friday before the event)**
 - This will have ALL players by club (those playing and those NOT playing). It is helpful to print this and have available at the pro-shop desk during checkin in case there are any last minute substitutions. This list will have everyone's DSI stableford quota.
- **The tournament fees to be billed are \$28 (not \$30) as in past year's. The payouts have been adjusted accordingly.**
 - Tournament fees are \$28. For 100 players that equals \$2,800
 - Please prepare 50 gift certificates/cards/vouchers; 10 per player for the top 5 teams

• 1st place	\$80	(10 players total \$800)
• 2nd place	\$65	(10 players total \$650)
• 3rd place	\$55	(10 players total \$550)
• 4th place	\$45	(10 players total \$450)
• 5th place	\$35	(10 players total \$350)
 - Total Payout \$2,800

Scoring is performed using large sheets

- Scoring is usually performed using large sheets with each team individually listed with the team name, player and their quota (as provided below). The placement of the sheets on the wall does not matter (any order is fine). An example of what was used in the past can be seen at https://www.dallasseniorinterclub.com/rpt_results_photo_2019_04_01/
- Score is standard stableford; points obtained minus quota yields +/- score
- **Max score in the DSI is +12 (anything over that is set to +12)**
- **Drop the two worst scores on each team and add the best 8 scores to get a team score to determine 1st, 2nd, 3rd, 4th and 5th place winners out of the 10 teams.**
- **TIES**
 - If a tie occurs between one or more teams:
 - First, add in the best score of the two that were dropped (use 9 best scores); to break ties only; not to be used against the field
 - If a tie still exists, add in the 10th score (use all ten scores)
 - If a tie still exists, then find the player with most points on each team and use that. Keep going down the list (2nd best player, 3rd best, etc.) until the tie is broken

As you (the Pro) are writing scores on the big sheets, a DSI representative will sit at a scoring table near the sheets and will enter the results into our electronic scoring system. We have found that by having a DSI rep enter the data on the computer AND the Pro writing the results on the big sheets, this allow for finishing about the same time. The results are then compared to make sure they are the same and no transcription errors have occurred.
